

TAP PROJECT EARLY CONTRIBUTION/CROWDSALE

How to participate using myetherwallet.com

Disclaimer: We offer the following instructions only as helpful guidance on one ERC20 wallet option for participating in the token sale. Buyers should do their own research and not rely solely on material we are presenting. We make no representations or warranties that the following material is complete or accurate, or that myetherwallet (or any associated software or services) will be reliable or function as described. As such, Buyers assume all risks associated with the use of myetherwallet (or any other ERC20 wallet) in connection with the token sale. For the terms and conditions concerning the token sale please visit [here](#).

STEP ONE:

Go to myetherwallet.com. Take all necessary precautions to avoid potential security or fraud issues.

STEP TWO:

If you have an account and want to use that account, sign in. If you need or want a new account, create one. This will create both private and public keys to your account.

- Choose a very strong password.
- Click "Generate wallet."

Generate Wallet

Enter a strong password (at least 9 characters)

Ledger & TREZOR users: Do not generate a new wallet—your hardware device is your wallet.
You can connect to your device, see your addresses, or send ETH or Tokens here.

- Now, follow the instructions on saving your public and private keys

MyEtherWallet Open-Source & Client-Side Ether Wallet • v3.8.3 English • ETH (MyEtherWallet) •

Save your Wallet File. Don't forget your password.

[? Keystore File \(UTC / JSON\)](#)

MyEtherWallet.com is not a web wallet & does not store or transmit this secret information at any time.
If you do not save your wallet file and password, we cannot recover them.
Save your wallet file now & back it up in a second location (not on your computer).

Caveat: You will not be able to access your account if you lose this information. In addition, if someone is able to access it, they will be able to take whatever is in your account. Use all necessary precautions to avoid this scenario.

STEP THREE: ACQUIRING ETH

If you have sufficient ETH, you can skip this step. If you want to acquire ETH, then follow these steps. You can purchase ETH with world currencies such as dollars, euros,

etc. on any of the well-known cryptocurrency exchanges. When participating in a crowdsale you will need the amount of ETH you are using for the token purchase plus a small amount of "gas," a small amount for transactions fees.

Caveat: Use only your own ETH account to buy tokens in the crowdsale. Do not use your "exchange account" or you risk both failing to acquire tokens and potentially losing all your ETH.

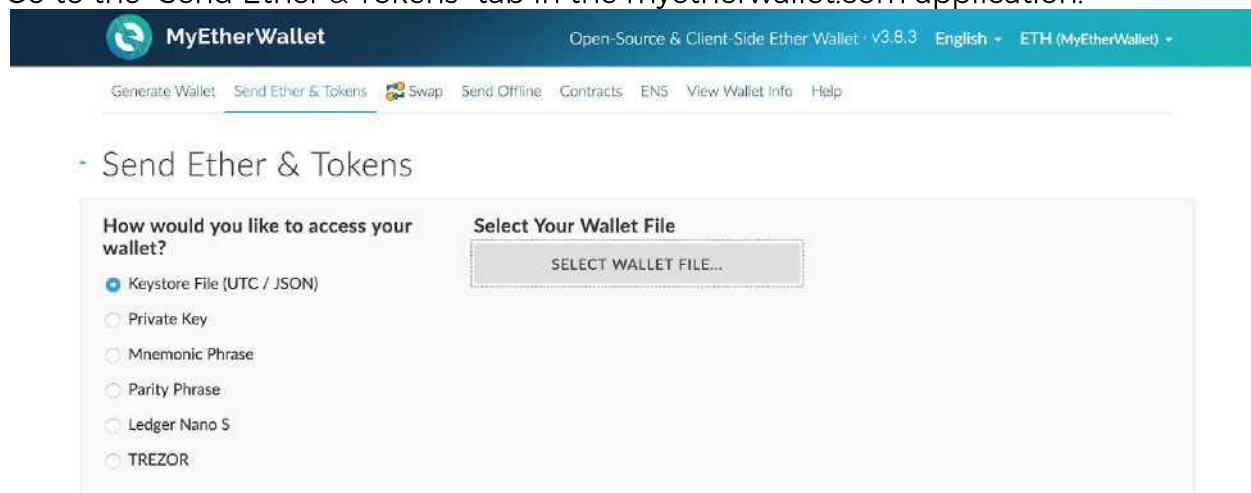

STEP FOUR: CONFIRM THE ADDRESS FOR THE EARLY CONTRIBUTION OR CROWDSALE

Go to www.tapproject.net and confirm the early contribution or crowdsale smart contract address. Make sure that this address is accurate, this is imperative. You need this location to participate in the sale. Errors can result in the lost of ETH and/or failure to participate in the token sale.

STEP FIVE: SEND ETH

Before sending ETH, you must ensure the early contribution or crowdsale has started. To ensure this is the case, visit www.tapproject.net for participation times.

Go to the "Send Ether & Tokens" tab in the myetherwallet.com application.

Open an account from which you wish to trade.

Fill out the "send transaction" form.

- In the "To address" field fill in the Tapcoin crowdsale smart contract address (to

- be shared on [Tap Project](#) website). Make sure the address is correct.
- In the "Amount to send" field add the amount of ETH you wish to use buying tokens.
- In the "Gas" field change the amount to a minimum of 300,000. This is to ensure the transaction is processed.
- Also set to "50 Gwei".

- Click on "Generate Transaction."

On the page that appears, click on "Send transaction."

Myetherwallet will generate a check, asking if you can confirm the transaction. Confirm all the data is accurate. If this is all correct and you want to proceed, then click "Yes, I am sure! Make transaction."

Once you have clicked on the "Yes, I am sure! Make transaction" button, DO NOT click on it again.

You have now purchased the amount of TTT that corresponds to the amount of ETH you sent. If the early contribution or crowdsale is not successful (please see white paper or early contribution document, you will be refunded.

You will receive your TTT tokens immediately as soon as you contribute, however, tokens will not be traded or transferable to exchanges until after main ICO is completed in Q4 2017.

STEP SIX: CONFIRM ETH WAS SENT

Finally, click on "Show All Tokens" to see all the TTT you own.

FREQUENTLY ASKED QUESTIONS

Please with the official: [MyEtherWallet's Help Center](#) if you have more questions.

TRANSACTION FAILED – “OUT OF GAS”

Each transaction requires gas and that gas is paid in Ether. MyEtherWallet estimates how much gas is needed, but sometimes it might not get it right. If that's the case you can try to manually increase the Gas limit.

WHILE UNLOCKING MY WALLET IT KEEPS FREEZING

It's a pretty intensive process and sometimes it just locks up. What we've found is that Chrome works really well majority of the time.
